

Global Pumps - your partner of choice

At Global Pumps we understand that every client has different requirements and different approach on servicing of pumps.

Our thinking is to understand and be flexible to support these differences.

We offer a diverse range of Pump repair services suited to the clients who requires an individual service to complement his maintenance or who requires a comprehensive solution to help lower the cost of ownership of his Pumps over their complete life cycle .

Pumps undergo huge stresses during operation, particularly under harsh pumping environments. Therefore care must be taken to make sure that pumps are maintained appropriately and repaired when needed.

Global Pumps's engineers are skilfully trained to perform complete pump repair services for all models of pumps. Global Pumps offers pump repair services at various places around the the country, tactically positioned to minimize the time pumps are unavailable.

Our Services

At Global Pumps, we provide you with a maximum of support over your Pump's life cycle. Through a successful mixture of key elements like :

- Good proactive planning
- World-class know-how
- Careful customising of services to your operational requirements,
- Complete understanding Pump operation and maintenance,

Global Pumps guarantees to improve your investment and provide high quality service depending on your requirement , ultimately , whatever your choice is ; our task is to ensure that the availability of pump is maintained.

Irregular or unprofessional maintenance could result in expensive downtime with subsequent loss of production or increased power cost affecting your profitability, and to ensure that will never happen, Global Pumps with its factory trained engineers have compiled a collection of after sales services that ensures nonstop availability of your pumping system, running as efficiently and economically as possible.

Periodic Inspections

Routine upkeep is the key for assuring optimal performance. For an inspection agreement, our specialists evaluate the pump, record results and make maintenance recommendations as appropriate. This is primarily done to keep a continuous tab on the health of the pump and to ensure adequate care is provided to the pump for proper up keep of the same.

Annual Maintenance Plan

Our Annual Maintenance plan covers all periodic servicing which will include 3 regular visit and one overhauling visit which would ensure that preventive upkeep is taken care of. We will ensure that quality spare parts are supplied at an extra cost which will ensure from any risk of failure or faulty parts.

Fixed Price Repair

Fixed price repair is a plan, ideal for large companies who have a Maintenance team exclusively maintaining the pump working there and that special guidance is required for certain diagnostics / overhauls or any other professional service can be made available for a lump sum charge.

Operation and Maintenance Contract

O&M contracts is a plan , ideal for organizations who have a fleet of pumps and do not want to have a separate maintenance team . We with our factory trained engineers would set up a 24/7 maintenance team within the factory premises to provide operation and expert maintenance solution which will ensure availability of the pump at all times working at optimum efficiency.

This plan would ensure that complete responsibility is taken up and best practices is followed

Pump Repair Procedures Include:

- Dismantling of all Components
- Inspection
- Evaluation of Repair
- Cost Estimates
- Repair utilizing skilled technicians
- Testing and power up
- Submission of Final report
